- No liquid remains, even when the mat is completely saturated.

Qualities / Type

The higher the durability, the stronger and longer the product can be used and remain in service. Depending on the application, you should therefore consider whether you need extremely high durability or whether normal quality is sufficient for your purposes.

Our nonwovens are available in various qualities:

Bondend: Single-layer structure with high absorption capacity, additionally bonded by welded dots.

For most everyday applications in the workplace. Highly absorbent binding fleece without additional reinforcement on the top or bottom. Suitable for economical use in cleaning up small spills or for daily use in cleaning, maintenance and repair work.
