

OEL-KLEEN

OIL ONLY PLAIN ABSORBENTS

Textile microfibre sorbents are divided into hydrophobic and hydrophilic.

Hydrophobic version consists of Oil Only sorbents whereas hydrophilic consists of universal and chemical sorbents.

Hydrophobic Oil Only sorbents absorb oils and oil products. These absorbents repel humidity and water. Even after soaking up the oil substances they still float on water. We make them in the colour white and blue.

Hydrophilic sorbents absorb aqueous solutions of acids and alkalis, as well as oil products. These don't float on water.

Oil Only absorbents are hydrophobic. They absorb oil and repel water. They are able to separate oil from water. Sheets, rolls, snakes, drum toppers, booms, sweeps and pillows from our oil only range are fast and highly absorbent with excellent tensile properties.

They are used on shorelines to stop oil from reaching land, in fuel leaking areas and so on. They float on water even when saturated, they are particularly suitable for marine spill control. Used absorbents can be properly incinerated to reduce disposal cost.

Plain oil sorbents are mainly used for liquidation of oil accidents on water. Excellently separates oils from water, while oil products sink into the absorbent. Even if full saturated it floats on the water. These plain absorbents are a very effective alternative to bulk inorganic sorbents.

They absorb up to **18 - 20 litres** of SAW 10W/40 oil per kilogram (depends on how large and heavy the sheet of absorbent is).

OIL ONLY LIGHT-WEIGHT SHEETS Type E230 / Item No 1020035

Composition:	100% Polypropylen
Dimensions:	30cm x 30cm
Sales unit:	100 pieces
Grammage:	180 g/m ²
Color:	white
Odor:	neutral
Square meters m ² / pack:	9
Gewicht pro VE:	1,62 Kg
Absorption / pack:	max. 32 L

► ZWEIFNIEDERLASSUNG

ESV GmbH
Petersbergstraße 5 | 55234 Bechtolsheim
