

OEL-KLEEN OIL ONLY SMS ABSORBENTS

Hydrophobic Oil Only sorbents absorb oils and oil products. These absorbents repel humidity and water. Even after soaking up the oil substances they still float on water. We make them in the color white and blue.

Store the sorbents only in dry rooms and, if possible, without long-term direct sunlight. In order to maintain the sorption capacity, it is especially necessary to store the products so that they are subjected to the lowest possible load.

The recommended way of disposing used sorbents is burning them in incinerators. OEL-KLEEN sorbents can be burned in any incineration plant without producing any hazardous waste. The choice of other disposal methods depends primarily on the substance that the sorbent is saturated with.

OIL ONLY SMS ABSORBENTS

Spunbond covering layer from both sides of meltblown to provide high durability, tensile strength and abrasion resistance. Bonded by points. Excellent absorbency and fluid retention. Thanks to spunbond covering layers on both sides linting is reduced dramatically.

They absorb up to 13 - 17,5 liters of SAE 10W/40 oil per kilogram (depends on how large and heavy the sheet of absorbent is).

OIL ONLY SHEETS SMS TYPE E100M / ITEN NO: 1020660

Basic Material:	100% Polypropylen
Dimensions:	40cm x 50cm
Sales Unit:	PE Foil Pack with 100 sheets
Grammage:	17/360/17 g/m ²
Color:	white
Odor:	neutral
Area m ² / unit:	40
Weight per pack:	7,88 kg
Absorption capacity Per Unit:	Ø 104 L / max. 114 l
