

OEL-KLEEN ABSORBENTS

Snakes CHEMICAL

CHEMICAL – YELLOW:

property: Hydrophilic, chemically inert, absorbs almost all liquids, including aggressive chemicals

Suitable for: Acids, alkalis, and aggressive media

CHEMICAL SORBENTS are hydrophilic. They deal with aggressive liquids such as acids or alkalis..

- Ideal for containing and absorbing oils, coolants, solvents, water, and other non-aggressive liquids
- Ideal for containing and absorbing acids, alkalis, and other aggressive chemicals
- Can be used in emergencies to contain leaks and in continuous use to absorb liquids
- The absorbent tubes can be easily shaped thanks to their stretchy cover. The contents of the absorbent tubes consist of extremely absorbent polypropylene..

They cannot be used on the water surface..

- Optimal suction power
- cost-effective
- Safe and non-slip
- No liquid remains, even when the mat is completely saturated..
