

OEL-KLEEN ABSORBENTS

Universal SM Sheets

UNIVERSAL - GRAY:

property: Hydrophilic, absorbs almost all liquids

Suitable for: Oils, coolants, lubricants, antifreeze, oil-water emulsions, and other aqueous liquids, as well as non-aggressive acids and alkalis

OEL-KLEEN Sorbents provide lasting protection, for example around or under machines and aggregates, and keep the workplace clean and safe..

- For absorbing all industrial liquids
- High absorption capacity - lower binder requirement
- Lightweight - makes transport easier and reduces waste
- Clean—no dirt, no dust, no sweeping
- Environmentally friendly - residue-free combustion
- Can be used preventively – prevents the spread of pollutants
- Economical—reduced labor and low disposal costs.

Examples of use:

- Absorption of all industrial liquids
- Ideal for leaks and maintenance work
- Can be used preventively
- Increased cleanliness and safety in the workplace
- Absorption on machine parts that are difficult to access.

Suitable for:

- in automotive repair shops
- in industrial plants on machines that are difficult to access

Qualities / Type

The higher the durability, the stronger and longer the product can be used and remain in service. Depending on the application, you should therefore consider whether you need extremely high durability or whether normal quality is sufficient for your purposes..

Our nonwovens are available in various qualities:

SM: Two-layer structure reinforced and lint-free on top

The fleeces have an additional lint-free protective fleece on the upper side. This additional robust layer ensures high tear and abrasion resistance. Ideal for almost all applications—for example, as a durable floor covering, for long-term use, or for cleaning work..
