

OEL-KLEEN Power Orange

Universally applicable, liquid cleaning agent, neutral to slightly acidic, for deep cleaning of mineral, synthetic, vegetable, animal, oil and grease stains. Cleaning concentrate for removing traces of oil on roads and traffic areas. With orange scent

OEL-KLEEN Power Orange is suitable for manual as well as machine use.

OEL-KLEEN Power Orange is suitable for cleaning floors of all kinds in rooms, open spaces, road surfaces and squares (with the exception of textile coverings).

Neutral against asphalt!

Water-dilutable and suitable for machine cleaning!

The recommended use concentration for normally soiled floors can be 10g per liter of water and in extreme cases 100g per liter of water.

The cleaning performance increases with increasing water temperature, but this should not exceed 40 ° C in order to ensure the effectiveness of the solvent.

In the event of an accident, work with an increased initial concentration. Process the affected surfaces evenly mechanically (scrubbing or cleaning machine). The emulsion that forms at the beginning should, if possible, be picked up with a suitable OEL-KLEEN binder or wet vacuum cleaner.

Foaming still indicates unused detergent. It is recommended to rinse with clear water after each use.

OEL-KLEEN Power Orange is completely biodegradable.
